PRODUCT CATALOG

We deliver quality solutions every day, all year round.

About Us

Secured365 since 2017 started the concept of sourcing components from different parts of the world, parts which included heavy transformers, PCBA and getting the finished products produced under all the quality assurance and certification likes FCC CE AND ROHS through manufactures in India having ISO certified units. Our products range has POE switch, 12v Dc power supplies from 1amp to 20amp, Surge Protectors with brass terminal strips and overload function. Products are exported through our office in India and Dubai. Products designed and produced are made considering the application of CCTV systems to be up and running for 365 days without any major issues and also by designing a support model by providing ample stock which is to be used for immediate support to system integrators allowing them to pass the same to the end customers. Secured365 ensures best of services through system integrators which covers the end customers downtime of the system.

Our vision

The vision is to be the leading OEM supplier, exporter and solution provider across the globe for CCTV related active component products which are the most important components to keep the CCTV system running 365 days!
